PERSONAL PROJECTS

Reddit clone - React & MaterialUI

- Live Preview: <https://reddit-clone-59235.web.app/>
- Use of Firebase to authenticate users and to manage the database.
- Application of different patterns to have an organized and clear structure folder.

Food Delivery - React & Typescript

- Live Preview: <https://food-delivery-3d3f4.web.app/>
- It's a fairly simple project that has given me the opportunity to introduce myself to Typescript. With expectations to include new features in the near future.
- MUI as library for the UI.
- useContext and useReducer have been used in this project.

Personal Diary - React & Bootstrap

- Live Preview: <https://diary-dd0de.web.app/>
- CRUD Operations, a project in which you can create, edit and delete entries, you are only able to see the entries of the user login.
- Bootstrap is used to style the UI.
